

NET/release material and post-translational-modification annotation

Compositional reading of structured released neutrophil-associated material in RA/SLE · Chapman_PXD011796

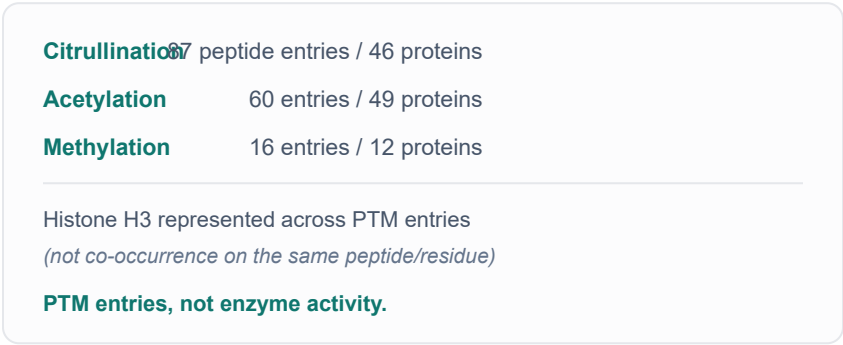

a · Structured released material

b · Module annotation (proteins · q-significant)

c · PTM annotation (Table_6 entries)

d · What this annotates — and what it does not

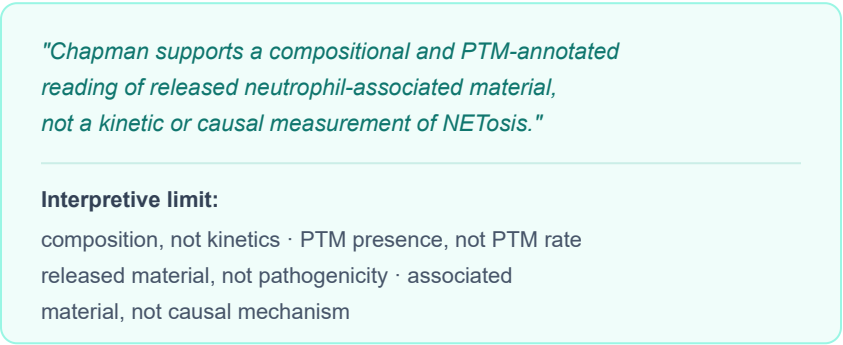

Figure 5 · composition of released material + PTM annotation · not NETosis rate, not enzyme activity, not pathogenicity, not causal
